Product Overview

Steelseries Rival 710 black optical Gaming Mouse - with prism 16.8m color LED in 2 zones, customizable tactile led + vibration feedback, customizable OLED side display, soft-touch + double-shot injected rubber grips, reinforced left and right buttons

Specifications

Features:

The World's Most Advanced Gaming Mouse
The Rival 710 is the only mouse that features an OLED screen, tactile feedback, and the most accurate sensor ever made.

Customizable OLED screen
Visual notifications. In-game statistics. Button mappings.

Vibrating tactile alerts
Tactile notifications. Instant game cues. Customized vibration patterns.

TrueMove3 optical sensor
True 1 to 1 tracking. No tracking errors. No response time delays.

OLED notifications
Knowing is half the battle, and that is why we've equipped the Rival 710 with a completely customizable OLED Display. Access on-the-fly sensitivity settings, in-game statistics, button mapping, and personalize the display with your gamer name or favorite team's logo.

Real-time notifications
Display notifications from Discord and games such as CS:GO, Dota2 and more

On-the-fly adjustments
Visual conformation of sensitivity settings, button mappings, and profile switches

Make it your own
Personalize the display with your gamer name, favorite team logo, or GIF animation

Alerts you can feel
The mouse is no longer merely an input device; you can now feel in-game events, aiding in critical decision-making. Customize every aspect of the alerts from intensity to vibration patterns.

Never miss a cooldown
Notifications when your ultimate is ready, or your health is low

Feel your weapons
Immersive tactile feedback when it's time to reload your weapon

True 1 to 1 tracking
TrueMove3 sets the new standard for all gaming sensors in the past and the future. Instead of focusing on CPI alone, TrueMove3 was engineered for true 1 to 1 tracking. Moving a specific distance on a mousepad results in the same exact distance on screen. No acceleration, no tracking errors, and no lag.

Swappable modular parts
A modular design allows you to swap out the sensor, cable, or cover, so the mouse fits your personal preferences, and is ready for the future when new sensors are released.

Built for battle
Developed with the three basic principles of revolutionary performance, unreal durability, and powerful flexibility, the Rival 710 delivers when you need it the most, in battle.

Mechanical switches
High performance 60 million click switches

Split-trigger buttons
Double shot for durability and click feel

Soft touch finish
Comfortable top finish to lock in your grip

Armed for performance
Powerful 32-bit ARM processor allows you to save CPI settings, button remappings and lighting effects on-board for software free use at LAN events and tournaments.

Rev up the Engine
SteelSeries Engine Software unlocks an impressive arsenal of Engine Apps that make customization of the 2-zone RGB lighting easy and intuitive. The Discord and GameSense Engine Apps allow for chat notifications, in-game events, and more..

ERGONOMIC DESIGN
Every aspect of the Rival 710 design meets players' stringent demands for comfort. Whether you deploy a claw grip or palm grip, the shape will provide perfect comfort for long and intense gaming sessions.
