Product Overview

APC NetBotz Room Monitor 455 (with 120/240V PoE Injector)

Specifications

Overview:

Features integrated camera and sensors (temperature, humdity, airflow, dewpoint, camera motion). Supports 3 additional external cameras pods, 2 sensor pods and up to 16 Universal Sensors.

Features:

2-Way audio
Supports remote service capability through speaker and microphone inputs. Advanced Software Pack #1 required to enable functionality.

Password Security
User-selectable password with strong password rules and reset password mechanism.

Event-driven video storage
Video storage prompted by motion or alert.

Browser Accessible
View the user interface with a browser. Provides quick access from anywhere on a secure network.

Advanced View client application
Robust appliance interface provides historic alerts, graphs, and configuration.

Enterprise management system compatible
Make device information available to your preferred enterprise management system by forwarding SNMP traps (events) across SNMPv1 and SNMPv3 using the PowerNet MIB

Integrates with StruxureWare Data Center Expert
An IT-ready, scalable access monitoring system that collects, organizes, and distributes critical alerts, surveillance video and

key information, providing a unified view of complex physical infrastructure environments from anywhere on the network

Alerts View
Easily review and correlate alerts. Provide context to alerts by attaching video clips, graphs, and maps.

Customized escalation policies
Alerts are managed according to your escalation policies and received in multiple formats.

Adjustable threshold
Customize threshold definitions (multiple thresholds per sensor, scheduling, severity levels) to your requirements.

Fault notification
Real-time event notification minimizes response times to critical physical infrastructure situations. Enables IT Administrators to reduce mean time to repair, improve efficiency, and maximize uptime.

Surveillance
Detect and record motion, allowing a visual record to be paired with an access or environmental alert, which speeds root cause analysis.

Environmental monitoring
Prevent equipment failure from a full range of threatening environmental conditions.

Access monitoring
Detect access by unauthorized personnel via door switch.
