NET003

Microworld RJ45 Extension Connector Inline

Product Overview

Microworld NET003 RJ45 Extension Connector Inline; RJ45 inline coupler; female-to-female RJ45; Ethernet cable extension; joins two compatible RJ45 network cables; plug and play; home networking; office networking; network installations

Specifications

About this product

The Microworld NET003 RJ45 Extension Connector Inline is a practical female-to-female RJ45 network coupler designed to join two compatible Ethernet cables into a longer network connection. Its plug-and-play design provides a simple solution for extending existing RJ45 network cabling without replacing the original cables. Ideal for home networks, offices, computer installations and general Ethernet cabling tasks. Buy now from our website for a convenient RJ45 cable extension solution.

Overview Summary

Microworld NET003 RJ45 Extension Connector Inlineis an RJ45 in-line network connector designed to join two RJ45 Ethernet cables. It provides a straightforward way to extend an existing wired network connection where the available cable length is insufficient.

The compact connector uses RJ45 connections and is suitable for general Ethernet cabling applications. It is useful for connecting pre-terminated network cables during computer, router, switch and network installation work.

Performance tier: Standard

Uses: Ethernet cable extension, home networking, office networking, computer networking, router connections, switch connections, network installations

Description

The Microworld NET003 RJ45 Extension Connector Inline is designed to provide a simple connection between two RJ45 network cables. Instead of replacing an existing Ethernet cable with a longer cable, the inline connector allows compatible pre-terminated RJ45 cables to be joined together.

This type of RJ45 coupler is useful when an existing network cable does not reach the required connection point. It can be used as part of general wired networking setups involving computers, routers, switches and other equipment that uses RJ45

Ethernet connections.

The compact inline format makes the NET003 suitable for basic network installation and maintenance tasks. It provides a convenient solution for extending network cabling while keeping the installation straightforward and easy to manage.

Features

The Microworld NET003 provides a practical way to join compatible RJ45 Ethernet cables without replacing the existing cabling.

- RJ45 in-line extension connector
- Designed to join two compatible RJ45 network cables
- Female-to-female RJ45 connection format
- Simple plug-and-play cable connection
- Suitable for extending existing Ethernet cable runs
- Useful for home, office and general network installations
- Compact design for convenient cable joining
- Suitable for use with standard RJ45 network cables

What's in the Box

- 1 x Microworld NET003 RJ45 Extension Connector Inline

Specifications

- Brand: Microworld
- Model: NET003
- Product type: RJ45 extension connector
- Connector type: RJ45
- Connection format: Female-to-female inline connector
- Application: Ethernet network cable extension
- Installation type: Plug and play
- Compatible cable connection: RJ45 network cables

What is the Microworld NET003 RJ45 Extension Connector used for?

The Microworld NET003 is used to join two compatible RJ45 network cables together to extend an existing Ethernet cable connection.

Can the NET003 connect two RJ45 Ethernet cables?

Yes. The NET003 is an inline RJ45 connector designed to join two compatible RJ45 network cables.

Is the Microworld NET003 easy to install?

Yes. The connector provides a simple plug-and-play connection between compatible RJ45 cables and does not require specialist tools for joining the cables.

Where can the Microworld NET003 be used?

It can be used for general wired networking applications such as home networks, offices, computer installations, router connections and network switch installations.

Can the NET003 be used to extend an existing Ethernet cable?

Yes. Its primary purpose is to join compatible RJ45 cables when additional cable length is required.

Does the NET003 require a power supply?

No. The NET003 is a passive RJ45 cable connector and does not require an external power supply.
