KeyChron Low Profile Dye-Sub PBT LSA Full Set Keycap Set - Hacker Edition

Product Overview

KeyChron Low Profile Dye-Sub PBT LSA Full Set Keycap Set - Hacker Edition, 133 Keys, Low Profile, PBT material, LSA Keycap Profile, Mx-style stem Type

Specifications

Overview:

Engineered for discerning mechanical keyboard users, the Keychron Low Profile Dye-Sub PBT LSA Full Set Keycap Set - Hacker Edition delivers a premium typing experience with long-lasting durability and precision. Constructed from high-quality PBT material using a five-sided dye-sublimation process, each keycap features crisp, fade-resistant legends that remain sharp for years to come-ensuring a consistent, shine-free finish that withstands daily wear and extended use.

This full set of 133 keys is purpose-built for compatibility across a wide range of ANSI low-profile layouts including 60%, 65%, 75%, 80%, 96%, and 100%. Designed with the LSA (Low Profile Spherical Angled) profile, each keycap provides ergonomic curvature and a uniform typing surface for enhanced finger alignment and responsive feedback.

The Hacker Edition features a bold and modern aesthetic, tailored for users who demand both visual distinction and high-performance functionality. With no backlight pass-through, the legends retain a classic, opaque appearance, complementing minimalist setups and matte-finish keyboards alike.

MX-style stem support ensures seamless installation on compatible switches, making this set an ideal upgrade for Keychron's latest-generation low-profile mechanical keyboards. Whether you're customising your workspace, replacing worn keys, or elevating the tactile feel of your device, this keycap set offers professional-grade enhancement in both form and function.

Features:

- 133-key full set for ANSI low-profile layouts (60%-100%)
