Specifications

Overview:

When printing is all important, the C9850 will prove supreme. It provides high volume, high quality colour and mono print with little effort from users. The built in EFI Fiery System 8e controller also makes it exceptionally good value for money. This advanced feature adds extra print control to assist print management and simplify the production of more complex documents. Excellent print speed of 36ppm colour and 40ppm mono (A4) maximises productivity for both colour and mono usage. Premium print quality from 1200 x 1200dpi resolution.

Robust, award winning, digital LED single-pass print technology outperforms laser. EFI SpotOnTM enables users to print specific colours (e.g. corporate colours) taken from logos or other files, for a consistent professional finish. EFI ColorWiseTM provides accurate colour across platforms, applications and all types of media. It enables maximum control over colour quality with a suite of advanced and precise tools and personalised settings. ProQ4800 Multi-level technology and microfine High Definition toner together give a better level of detail, greater colour depth, reduced grain and a high gloss feel. Outstanding media handling from A6 to A3+ size, and 64 to 300gsm weight. High capacity internal trays maintain workflow and minimise user involvement. Template Manager 3.0 software is free in the box and holds many A3 and A4 template designs to assist in producing a variety of professional print items.
