Redragon SATURN Wired X/D-input (Digital/Analog) PC Controller Black

Product Overview

Redragon SATURN Wired X/D-input (Digital/Analog) PC Controller Black, Two analog joysticks on a single controller, Turbo mode, Vibration feedback, Wired controller

Specifications

Overview:

Make collisions more realistic with the new Redragon SATURN Wired X/D-input PC Controller. Latest PC games uses Xinput as an API (which is not supported by most old model controllers). This controller is ready to work with any gaming windows such as 7/8/10. The Saturn ensures effective use of weapons in shooter game, making this PC controller the best high-speed controller money can buy. You will always make the right move in any gaming situation.

Features:

- Two analog joysticks: Two mini joysticks allow you to play more games, such as football simulators Xinput games supported
- Turbo mode: Ensures effective use of weapons in shooter games
- Vibration feedback: Makes collisions more realistic (if the game supports vibration feedback of game controller)
- Wired controller

Specifications:

ComX Computers
