Product Overview

Redragon K673 UCAL Black 75% Magnetic Ultramag Switch Wired Keyboard; UltraMag magnetic switches; USB Type-C; 81 keys compact; 100M keystroke rating; black keyboard

Specifications

About this product

The Redragon K673 UCAL 75% Magnetic Ultramag Switch Wired Keyboard delivers precision input and lightning-fast actuation with advanced UltraMag magnetic switches, compact design and reliable USB connection for serious gaming and productivity.

Overview Summary

The Redragon K673 UCAL 75% Magnetic Ultramag Switch Wired Keyboard is engineered for gamers and typists who need responsive, consistent keystrokes and a compact layout. The UltraMag magnetic switches offer smooth linear actuation and durability rated for up to 100 million cycles, making it ideal for competitive play, fast typing or everyday use.

This wired keyboard features a streamlined 75 percent form factor that retains essential keys while reducing desk footprint, allowing more space for mouse movement. Plug-in USB connectivity ensures simple setup and reliable performance without latency issues, while its robust build stands up to intensive use.

Performance tier:Mid-range gaming/performance

Uses:gaming performance, typing, office work, competitive play, streamlined desk setups

Description

The Redragon K673 UCAL 75% Magnetic Ultramag Switch Wired Keyboard is designed for high responsiveness and dependable accuracy without the bulk of a full-size board. Its UltraMag magnetic switch technology provides a linear feel with smooth key travel and near-instantaneous actuation ideal for fast reaction gaming and consistent typing. With its compact 75 percent layout, essential keys are preserved while eliminating the number pad to maximise desk space and reduce reach distance. The wired USB connection ensures stable signal delivery with low latency, while rugged construction stands up to prolonged use.

Features

The Redragon K673 UCAL keyboard combines advanced switch technology with a compact layout and reliable build quality.

- Advanced UltraMag magnetic switches for smooth, consistent linear keystrokes under pressure.
- 75 percent layout preserves essential keys and enhances desk ergonomics.
- USB wired connection for dependable plug-and-play performance.
- High durability rated up to 100 million keystrokes for long-lasting use.
- Compact design ideal for gaming setups with limited space or pro desk configurations.

Engineered for the decisive moment: The Redragon K673 UCAL magnetic switch keyboard for South African gamers

In the intense theatre of competitive gaming, where milliseconds dictate victory or defeat, the Redragon K673 UCAL stands as a testament to precision and speed. This is not merely a keyboard; it is an extension of the gamer's intent, crafted for those who demand immediate feedback and flawless execution. Its 75% layout is a strategic choice, preserving the most critical keys while eliminating extraneous elements to maximise desk space and minimise hand travel, ensuring your focus remains solely on the game. Designed for the discerning South African player, this wired gaming keyboard bridges the gap between cutting-edge technology and practical, high-performance gaming peripherals. If your objective is to dominate, this Redragon gaming keyboard is your primary weapon.

The swift strike of magnetic actuation

At the core of the K673 UCAL's superior performance lies its revolutionary UltraMag magnetic switches. Unlike traditional mechanical switches, these employ magnetic technology to detect keystrokes, resulting in near-instantaneous actuation. This magnetic switch keyboard offers a tangible advantage in fast-paced scenarios where every fraction of a second counts. The

linear axis ensures a smooth, consistent travel from top to bottom, providing a predictable and responsive feel that is crucial for both rapid-fire gaming and precise typing. This mechanism significantly enhances the keyboard's overall speed and reliability.

A space-saving design for strategic dominance

The 75% layout of the Redragon K673 UCAL is a deliberate design choice, balancing functionality with efficiency. It retains the essential keys found on a full-size keyboard, including the function row and navigation cluster, but omits the numeric keypad. This compact form factor is ideal for gamers who utilise a low mouse sensitivity, as it provides ample space for broad mouse movements without sacrificing access to vital commands. For users with limited desk real estate, this wired gaming keyboard optimises workflow and gaming posture, creating a more streamlined and comfortable setup.

Built to endure the longest campaigns

Durability is paramount for any gaming peripheral, and the K673 UCAL is built to withstand the rigours of extensive use. With a rated lifespan of 100 million cycles per switch, this Redragon gaming keyboard is engineered for longevity. The robust construction and high-quality components ensure that it will remain a reliable companion through countless gaming sessions and intense typing marathons. This commitment to durability means you can invest with confidence, knowing that your keyboard is designed to perform consistently over the long term.

Seamless integration into your command centre

Connectivity is straightforward and dependable with the USB interface. Simply plug this magnetic switch keyboard into an available port on your South African system, and you are ready to engage. The plug-and-play nature of USB ensures a hassle-free setup, allowing you to get into your games or productivity tasks without delay. The keyboard's thoughtful design and advanced technology combine to deliver a superior user experience, making it an essential upgrade for any serious gamer or keyboard enthusiast.

What's in the Box

- Redragon K673 UCAL 75% Magnetic Ultramag Switch Wired Keyboard
- USB Type-C Cable

Specifications

- Keyboard layout: 75 percent (81 +1 keys)
- Switch type: UltraMag magnetic switch
- Switch feel: Linear axis
- Total travel: 3.50 x 0.20 mm
- Initial pressure: 35 x5 gf
- Lifespan per switch: 100 million cycles
- Interface: USB Type-C wired
- Colour: Black
- Product dimensions: 33.5 x 14 x 3.7 cm
- Product weight: 0.813 kg

FAQ**What type of switches does the Redragon K673 UCAL keyboard use?**

The Redragon K673 UCAL keyboard uses UltraMag magnetic switches with a linear feel for smooth, consistent keystrokes and rapid actuation.

Is this keyboard suitable for gaming?

Yes, the compact 75 percent layout and magnetic switches make it well suited for competitive gaming, fast input requirements and ergonomic mouse movement.

Can I use this keyboard for typing and office tasks?

Absolutely. Its linear switch feel and compact footprint make it comfortable for extended typing sessions and workplace productivity.

Does this keyboard require software to work?

No, the Redragon K673 UCAL keyboard functions with a standard USB connection and does not require additional software for basic operation.

Is the keyboard durable for long term use?

Yes, the keyboard is rated for up to 100 million switch actuations, offering longevity through extensive gaming and typing use.
