Overview Summary

The Microworld RGPT2M is a 2m RG174 Pigtail Extension designed for extending compatible antenna connections. The cable is suited to networking and wireless applications where additional cable length is required between compatible equipment and an antenna connection.

With its 2m length, the RG174 extension provides additional installation flexibility while maintaining a compact cable format. It is a practical choice for compatible router antenna and wireless networking setups requiring a longer connection.

Performance tier: Standard connectivity accessory

Uses: WiFi antenna extension, router antenna connections, wireless networking installations, compatible RF connections

Description

The Microworld RGPT2M RG174 Pigtail Extension provides 2m of additional cable length for compatible antenna and wireless networking connections. It is designed for installations where the existing antenna cable does not provide sufficient reach between compatible equipment and the required connection point.

The RG174 cable format makes this extension suitable for compact networking and antenna applications. A 2m length provides useful flexibility when positioning compatible wireless equipment and antennas, helping accommodate installations where additional separation or routing space is required.

This cable is intended for use with compatible connections and equipment. Before installation, verify that the connector

configuration of the extension matches the antenna, router or other compatible device being connected.
