RM-PDU-SA6

Unbranded PDU-SA6 PDU 1U Rackmount - 6 way 3 Pin SA plug

Product Overview

Unbranded PDU-SA6 PDU 1U Rackmount - 6 way 3 pin SA plug, Overload protection, 16A rated current, 3520W Max Output Power

Specifications

Overview Summary:

The Unbranded 6 Way 16A Rackmount Power Distribution Unit provides reliable power distribution for server racks, network cabinets, and professional IT installations. Built with a durable aluminium housing, it features six South African outlets, an integrated on/off switch, overload protection, and supports up to 3520W output for dependable everyday operation.

Ideal for businesses, installers, and home lab users across South Africa, this rackmount PDU is designed for easy horizontal installation in standard 19-inch racks. Buy now to keep your equipment powered safely and efficiently, or shop now to upgrade your rack power management.

Performance tier: Professional

Uses: Server racks, network cabinets, IT equipment, telecommunications installations, data cabinets, AV racks, office power distribution

Overview:

19 Inch Rackmount 6 Way South African Power Distribution Unit
Keep your rack equipment powered safely and efficiently with this 6-way rackmount Power Distribution Unit (PDU). Designed for server cabinets, networking installations, AV systems, and IT environments, it provides reliable power distribution through six South African 3-pin outlets. The sturdy aluminium housing, integrated power switch, and overload protection make it a practical choice for professional installations requiring dependable power management.

Description:

The RM-PDU-SA6 is a rackmount 6-way Power Distribution Unit built for 19-inch rack environments. It delivers up to 3520W of output power with a 16A rated current and includes six South African 3-pin outlets, an illuminated on/off switch, and built-in

overload protection. Its durable aluminium construction, left-side power input, and horizontal mounting design make it suitable for servers, networking equipment, security systems, telecommunications, and AV installations.

Features:

Why Choose This Rackmount PDU

Whether you are building a new server rack or expanding an existing installation, this rackmount PDU offers an effective way to distribute power to multiple devices from a single source. The robust aluminium enclosure provides long-lasting durability, while the integrated overload protection helps safeguard connected equipment against excessive current.

The horizontal rackmount design allows for a clean and organised installation, helping reduce cable clutter while keeping power connections easily accessible.

Key Highlights

- Part Number / SKU: RM-PDU-SA6
- Designed for standard 19-inch rack installations
- Six South African 3-pin power outlets
- Rated current of 16A
- Maximum output power of 3520W
- Built-in overload protection
- Integrated on/off power switch
- Strong black aluminium housing
- Horizontal rackmount installation
- Left-side power input
- Supplied with a 2 metre power cable

Technical Details

- Product type: Rackmount Power Distribution Unit
- Model: PDU6-SA
- Part Number / SKU: RM-PDU-SA6
- Output outlets: 6 x South African Type
- Rated voltage: 250V
- Rated current: 16A
- Maximum output power: 3520W
- Housing material: Aluminium
- Housing colour: Black
- Case length: 432.6 mm
- Mounting length: 465 mm
- Input location: Left
- Input plug: 16A South African plug
- Cable specification: 3G x 1.5 SQMM
- Cable length: 2 metres (approximately 1.8 metres net length)
- Installation: Horizontal rackmount
- Control function: Power switch
- Protection: Overload protection
- Internal assembly: Spot welding and soldering
- Cable fixing: A4 cable clip

Suitable Applications

This Power Distribution Unit is ideal for powering equipment in:

- Server racks
- Data cabinets
- Network cabinets
- Telecommunications installations
- CCTV systems
- Audio visual equipment racks
- IT infrastructure deployments

The RM-PDU-SA6 provides dependable power distribution with six South African outlets, a durable aluminium construction, overload protection, and a generous 3520W maximum output, making it an excellent solution for professional rack-mounted installations.
