The ReadyNAS® Ultra family is designed specifically for advanced media users in home and small business environments
overview-logosAvailable in diskless and populated configurations, the NETGEAR® ReadyNAS® Ultra family provides advanced multimedia sharing, file sharing, iSCSI block access, and dynamic ReadyNAS® X-RAID2™ volume expansion technology so that advanced home and small business users will enjoy an optimal content sharing and data protection experience.

Home users will enjoy media-rich features such as ReadyDLNA™ media serving, ReadyNAS® Photos II HD photo sharing, ReadyNAS® private cloud technology, and ReadyNAS® mobile access for iOS and Android™ devices. Advanced home users can also download a wide selection of add-ons from the ReadyNAS® community to run on their ReadyNAS® storage device. Because the ReadyNAS® Ultra family is a Linux®-based storage platform, it can support just about any open-source program designed by our ReadyNAS® users-and there are plenty to choose from. ReadyNAS® users can, for example, transcode their videos on the fly using Plex or download peer-to-peer (P2P) files using Transmission.

Small business users, on the other hand, will appreciate NETGEAR's industry-leading warranty terms, ReadyNAS® Vault™ hybrid cloud solution, and other useful add-ons from NETGEAR® and NETGEAR® partners that support business continuity and growth.

Create your own Private Cloud
With NETGEAR® ReadyNAS® private cloud technology, home and small business users can now turn their ReadyNAS® storage device into a private cloud so they can access, view, edit, or share their data remotely. ReadyNAS® users get bigger storage capacity, tighter privacy and security controls, and best-in-class storage features at affordable prices-without the monthly usage fees, subscription charges, or capacity limits. It has never been easier to store, share and protect your data.
