ROCCAT Leadr Wireless Multi-button RGB Gaming Mouse

Product Overview

ROCCAT Leadr Wireless Multi-button RGB Gaming Mouse

Specifications

Overview:

The Leadr gives you the freedom of wireless with the performance of wired. It rocks a combo of pioneering wireless technology and an optimized Owl-Eye optical sensor, meaning gaming with a wireless mouse is no longer a handicap. Zero lag and with virtually zero latency, it features a docking station with a top-cup cable for use as a wired mouse, plus an innovative suite of buttons for enhanced control. The Leadr is the wired mouse with no wires, making it wireless royalty.

Features:

Wireless without compromise
What sets the Leadr apart from its competitors is its pioneering wireless technology. Leadr was developed with a view to providing gamers with a wireless mouse that performed just as well as a wired one. With 1000Hz polling and 2.4GHz data transmission - faster than USB - it boasts zero lag and virtually latency, for lightning-fast input. This technology is complemented by the pioneering ROCCAT® Owl-Eye optical sensor, which is optimized for wireless. Other wireless mice make sacrifices by using power-saving modes but Owl-Eye uses full power all the time, bringing the feeling of wired to wireless.

Charging dock plus top-up cable
In your hands it's a lethal gaming weapon, but a weapon is only as good as the holster holding it. With a premium docking stand featuring charging and battery status LEDs, the Leadr is ready, primed and at your side for all your gaming sessions. Your 20-hour battery is running low or you just want to use the mouse in wired mode? Connect the top-up cable to carry on gaming. Freedom without compromise.

Next-gen button layout
Designed for the latest generation of games, the Leadr features 14 fully-programmable mouse buttons plus a solid 2D Titan Wheel. Front and center of its arsenal is the X-Celerator single-axis analog thumb paddle, for enhanced functionality while maintaining perfect mouse control. Also featured is the mid-knuckle Fin Switch, for rapid and instinctive control.

Your Leadr, your style

Fully customize the look of your Leadr with new industry-standard RGB lighting illumination system. Adjust the color of your scroll wheel and ROCCAT® logo independently of one other for your own unique look. With a variety of enhanced lighting effects to choose from and your choice of 16.8 million colors, the Leadr melds on every level to your style.

ROCCAT® Owl-Eye optical sensor
Owl-Eye is the exciting new optical sensor from PixArt, modified to the high and exacting standards of ROCCAT®. Taking its inspiration from the natural world, it boasts a real and responsive feeling that's instantly recognizable. The sensor can be configured in terms of the ROCCAT®-pioneered Distance Control Unit (DCU), with the dpi adjustable in 100-dpi steps from 100 to 12000, although we recommend a 400 - 3000dpi range as optimal.

ROCCAT® Swarm
Swarm is the software incarnation of ROCCAT's future ready philosophy. It'll cover you for all relevant gaming platforms and devices. It's the next-gen system that keeps on top all games, apps and ROCCAT products in one place. It provides next-level product integration, working as a unified driver suite with an overview of all of your ROCCAT devices. Say goodbye to multiple tray icons - with Swarm you have a veritable gaming command HQ for every weapon in your arsenal.

System requirements:

- Windows® 8, Windows® 7, Windows® 10
- USB 2.0 Port
- Internet connection for driver installation

Specifications:

- ROCCAT® Owl-Eye optical sensor with 12000dpi
- Wired/Wireless combo mouse
- 1000mAh inbuilt Li-Ion rechargeable battery
- 2.4GHz wireless transmission
- 1000Hz polling rate
- 50G acceleration
- 250ips maximum speed
- Mouse acceleration: no
- Angle snapping: no
- 72MHz ARM Cortex-M0 (both mouse & stand)
- Adjustable lift-off distance
- 32-Bit Processor for rapid macro execution
- 1.8m micro USB to USB cable
- Dimensions / Weight - Width 8cm, Height 4.5cm, Length 12.6cm, Weight 134g
