

ROGRYUOIV360ARGB WH

Asus ROG Ryuo IV 360 ARGB Liquid CPU Cooler White Edition

Product Overview

Asus ROG Ryuo IV 360 ARGB Liquid CPU Cooler White Edition, Asetek GEN8 v2 pump with Copper CPU plate and Aluminium radiator, 6.67-inch Curved 2K AMOLED Display on the pump head, Three ROG MF-12c ARGB fans rated at 30.7 db(a) Maximum noise Level, Daisy-chain ARGB connectivity reduces cables to a single connection, Supports AMD AM5 / AM4 and Intel LGA1851 / 1700 / 1200 / 115x sockets, Innovative sliding mechanism allows horizontal adjustment of the screen module, Includes pre-applied Thermal compound for direct installation, White Colour finish with Aura Sync RGB Lighting support, Tube length measures 400 mm

Specifications

Overview Summary:

Upgrade your gaming rig with the ASUS ROG RYUO IV 360 ARGB Liquid CPU Cooler White Edition, now available for immediate delivery across South Africa. This premium all-in-one cooler combines elite thermal performance from the Asetek Gen8 V2 pump with a stunning 6.67-inch curved 2K AMOLED display that serves as the centerpiece of your build. Designed specifically for high-end Intel Core Ultra and AMD Ryzen processors, it ensures whisper-quiet operation while maintaining optimal temperatures under heavy loads.

Experience unparalleled customization through the ASUS InfoHub software, allowing you to display real-time stats, custom GIFs, or media directly on the pump head. The sleek white aesthetic and daisy-chain ARGB fans minimize cable clutter while maximizing airflow efficiency. Don't settle for standard cooling solutions; secure your system's longevity today by buying now.

Performance tier:High-end / Enthusiast

Uses:PC gaming, video editing, 3D rendering, overclocking, content creation, streaming

Overview:

The ASUS ROG RYUO IV 360 ARGB Liquid CPU Cooler White Edition redefines the standard for high-performance cooling by blending elite thermal engineering with a stunning visual centerpiece. Designed for builders who refuse to compromise, this all-in-one liquid cooler features a massive 360mm radiator and an advanced Asetek Gen8 V2 pump capable of maintaining stable temperatures for demanding AMD Ryzen or Intel Core Ultra processors.

Description:

This premium cooling solution stands out with its unique 6.67-inch curved 2K AMOLED display, allowing users to showcase custom content, real-time hardware stats, and vibrant animations directly on the pump head. The unit includes three ROG MF-12C ARGB fans that deliver high airflow at whisper-quiet levels while utilizing a daisy-chain design to minimize cable clutter inside your case. Compatible with the latest AM5 and LGA socket platforms, this cooler ensures optimal heat dissipation for extreme gaming or heavy workloads.

The ROG RYUO IV 360 ARGB is engineered for those who demand both style and substance. The curved AMOLED screen transforms the pump head into a dynamic canvas where you can view system temperatures, run custom GIFs, or display personalized branding through the ASUS InfoHub software. An innovative sliding mechanism lets you adjust the screen angle horizontally to avoid interference with memory modules while keeping your build looking clean.

Features:

Thermal Performance and Mounting

At the heart of this cooler lies the Asetek Emma Gen8 V2 pump, which drives cooling fluid through a copper base plate and an aluminum radiator to ensure efficient heat transfer. The Precision Mount System is specifically optimized for Intel Core Ultra Series 2 processors, applying uniform contact pressure across the CPU surface for maximum thermal efficiency. A premium metal backplate provides superior rigidity and heat resistance compared to plastic alternatives, ensuring durability over time.

Fan Design and Connectivity

The unit comes equipped with three ROG RYUO IV MF-12C ARGB fans that are pre-attached for faster assembly. These 120mm PWM fans spin up to 2000 RPM, delivering 56.66 CFM of airflow and 3.56 mmH2O static pressure while maintaining a maximum noise level of just 30.7 dB(A). The daisy-chain architecture condenses six separate cables into a single connection that handles both power and ARGB signaling simultaneously.

System Compatibility

This cooler supports a wide range of modern platforms, including AMD AM5 and AM4 sockets as well as Intel LGA1851, LGA1700, LGA1200, and LGA115x. Full ASUS Aura Sync compatibility allows you to synchronize the lighting across your entire ROG ecosystem for a unified visual experience.

Key Specifications

- Radiator Size: 360 mm
- Tube Length: 400 mm
- Pump Display: 6.67-inch curved 2K AMOLED LCD Screen
- Fan Count: 3 ROG MF-12C ARGB Fans (120mm)
- Max Noise Level: 30.7 dB(A)
- Socket Compatibility: AM5, AM4, LGA1851, LGA1700, LGA1200, LGA115x
- Color: White

What's in the Box

- ASUS ROG RYUO IV 360 ARGB CPU Liquid Cooler White Edition (Part Number: ROGRYUOIV360ARGB WH)
- 120mm ARGB Radiator Fan x3
- Quick Start Guide x1
- Accessory Pack of Screws and Brackets x1
- Thank You Card x1

Why Choose ROG

The Republic of Gamers (ROG) brand represents a commitment to pushing the boundaries of gaming hardware. This cooler exemplifies that mission by delivering cutting-edge performance in a package designed for the discerning enthusiast who values both extreme cooling capabilities and extraordinary aesthetics.

FAQ

Does the ROG RYUO IV 360 ARGB fit all modern CPU sockets?

The cooler supports broad compatibility including AMD AM5, AM4 and Intel LGA1851, LGA1700, LGA1200, and LGA115x platforms.

Can I customize what is shown on the pump display?

Yes, through ASUS InfoHub software you can set 3D visual effects, custom content, GIFs, images, videos, or real-time hardware information, with options for content splitting and a built-in style library.

Will this cooler interfere with my RAM modules due to the screen size?

No, the pump head features an innovative sliding mechanism that allows horizontal adjustment of the 6.67-inch curved 2K AMOLED display to optimize viewing angles without blocking memory or other components.

How much cabling is required for installation and lighting control?

The daisy-chain ARGB design connects all three fans with a single cable that carries both power and signal, while Aura Sync compatibility allows unified control of the lighting across your entire system.

Is thermal paste included or do I need to apply it manually?

The product comes with premium thermal compound pre-applied to the copper CPU plate, allowing you to install the cooler straight out of the box without additional preparation.
