Asus ROG Ryuo IV SLC 360 ARGB White Edition 360mm Liquid CPU Cooler - White

Product Overview

Asus ROG Ryuo IV SLC 360 ARGB White Edition 360mm Liquid CPU Cooler - White, 360 mm radiator size for high-capacity heat dissipation, Curved LCD pump Display for live stats or custom content, Supports Intel LGA 1851 and LGA 1700 sockets, Compatible with AMD AM5 and AM4 sockets, Includes three 120 mm ROG ARGB fans, Maximum noise Level of 39.6 dB under sustained load, Daisy-chained ARGB Lighting compatible with Aura Sync, Pre-applied Thermal compound on Copper Cold plate, 200 mm sleeved fep tube length for Compact installation, White finish Colour for aesthetic builds

Specifications

Overview Summary:

Upgrade your PC setup with the ASUS ROG Ryuo IV SLC 360 ARGB White Edition, a premium liquid CPU cooler engineered for demanding performance in South Africa. This sleek white all-in-one solution features a striking curved LCD display that lets you monitor real-time stats or showcase custom visuals, making it the perfect centerpiece for your high-end build. With support for the latest Intel and AMD processors, daisy-chained ARGB fans, and whisper-quiet operation, this cooler delivers elite thermal headroom without compromising on style.

Designed for enthusiasts who value both aesthetics and engineering, the Ryuo IV SLC ensures your CPU stays cool under heavy loads thanks to its 360mm radiator and three dedicated ROG ARGB fans. The pre-applied thermal compound simplifies installation, while Aura Sync compatibility allows you to synchronize lighting across your entire system for a cohesive look. Don't settle for average cooling; secure the ultimate performance upgrade for your rig today.

Shop now at our online store and experience the perfect blend of power and design tailored for South African gamers and builders. Buy now to elevate your system's capabilities and join the ranks of those who dare to push their hardware further.

Performance tier:High-end enthusiast

Uses:CPU cooling, gaming PCs, custom water loops, overclocking, content creation workstations

Overview:

The ASUS ROG Ryuo IV SLC 360 ARGB White Edition (Part Number ROGRYUOIVSLC360ARGBWH) is designed for high-performance PC builders who demand both thermal efficiency and visual impact. This premium all-in-one liquid cooler features a large 360mm radiator paired with three dedicated ROG ARGB fans, ensuring that even the most power-hungry Intel Core Ultra or AMD Ryzen processors stay cool under intense load. The standout design element is the curved pump display, which serves as a dynamic focal point for your build, allowing you to view real-time system stats or showcase custom content directly on the cooler.

Description:

This white edition AIO liquid cooler combines elite cooling performance with aesthetic customization. Key benefits include a curved LCD pump display for live monitoring and personalization, daisy-chained ARGB fans that simplify cable management while syncing lighting across your build via Aura Sync, and broad compatibility with the latest Intel and AMD platforms. The unit arrives with pre-applied thermal compound for quick setup and features durable FEP tubing to ensure reliable long-term

operation.

Features:

Elite Cooling Performance

The Ryuo IV SLC is engineered to handle demanding workloads without compromising on noise levels or visual style. By utilizing a 360mm radiator, the system provides significant surface area for heat dissipation, allowing fans to spin at lower speeds while maintaining optimal temperatures. This balance results in quiet operation rated at just 39.6 dB(A), ensuring your gaming sessions and productivity tasks remain undisturbed by loud cooling noise.

A Curved Display for Personalization

Gone are the days of plain plastic shrouds hiding your system's engineering. The curved display on the pump head transforms the cooler into a centerpiece that reflects your unique style. Through the ASUS InfoHub software, users can monitor live hardware information such as CPU temperature and fan speed, or upload custom images, GIFs, and videos to create a truly bespoke look for their white-themed rig.

Simplified Installation and Connectivity

Building with this cooler is streamlined to reduce clutter inside the case. The three ROG ARGB fans are daisy-chained, meaning both the lighting effects and fan motors run off a single cable connection rather than requiring multiple individual wires. Additionally, the copper cold plate comes pre-applied with thermal compound, eliminating the need for manual paste application before mounting. The 200mm sleeved FEP tubing is designed to be flexible yet durable, fitting comfortably into most modern chassis.

Broad Platform Support

This cooler supports a wide range of current-generation processors across both major brands. It is fully compatible with Intel LGA 1851 and LGA 1700 sockets, as well as AMD AM5 and AM4 platforms. Whether you are upgrading an existing system or building from scratch, the mounting hardware included ensures a secure fit for your specific motherboard.

Why Choose ASUS ROG

ASUS Republic of Gamers is dedicated to pushing the boundaries of system performance. The Ryuo IV SLC series exemplifies this commitment by merging serious thermal engineering with a striking, statement-making design. For enthusiasts looking for a reliable cooling solution that performs as hard as it looks, this white edition AIO cooler delivers confidence and style in equal measure.

FAQ

Is this cooler compatible with my current motherboard?

The ASUS ROG Ryuo IV SLC 360 supports a wide range of sockets, including Intel LGA 1851 and LGA 1700, as well as AMD AM5 and AM4 platforms.

Can I customize the display on the pump?

Yes, the curved LCD screen allows you to monitor live hardware information or upload custom images, GIFs, and videos using the ASUS InfoHub software.

Does this cooler come with thermal paste pre-applied?

Yes, the copper cold plate arrives with pre-applied thermal compound to simplify installation.

How does the lighting system work for a unified look?

The three ROG ARGB fans are daisy-chained and support Aura Sync, allowing you to synchronize lighting across the fans and pump with other compatible components via a single cable connection.

Is this cooler noisy during operation?

No, the system is designed for quiet performance, maintaining a maximum noise level of 39.6 dB(A) even under sustained load.
