Specifications

Overview:

Discover the future of home entertainment with the Samsung ES6200 Slim LED TV. Advanced Smart Interaction technology makes it easier to control, and you can access a wide range of Smart Hub content, 3D entertainment and apps as well as web browsing and more.

Features:

True 3D experience in a whole new light
The Samsung LED TVs have created an entirely new and immersive viewing experience when it comes to home entertainment. With the latest 3D imaging technology, you will be completely immersed in a new world of TV viewing reality.

More vibrant colours for better images
Using an advanced picture quality improvement algorithm, Samsung's Wide Colour Enhancer Plus drastically improves the quality of any image and uncovers hidden details. Now see colours as they were meant to be seen with Wide Colour Enhancer Plus.

Designed for maximum appeal
Samsung's One Design maximises the viewing experience as well as enhances your home interior. One Design elegantly combines the LED TV's bezel with its panel to remove any barriers from a seamless viewing experience.

Access the Internet without wires
With Wireless LAN Built-in, streamline your TV's connectivity capabilities without adding more external devices and maintain its attractive design.

Wirelessly access and stream your content
Make the most of all your content and devices with wireless sharing. Thanks to AllShare Play, you can stream movies, photos, music and more from any compatible devices nearby, including PCs. Cloud technology and Samsung web storage give you even greater freedom and mobility, allowing you to access and share multimedia when you're away from home, too. Now you can enjoy all your favourite content on your TV or away from it.

Enjoy apps, videos, Skype, web browsing and more
Discover a new world of social and personalised home entertainment with Samsung's updated Smart Hub and three great new services. Family Story lets you share special photos, messages and events with loved ones. Meanwhile, children can stay entertained and educated with the Kids feature. You can also exercise and manage your training using Fitness. With access to great content as well as a selection of Samsung Apps, web browsing, Skype and more, this is the ultimate family home entertainment experience.

Discover a new reality in Full HD
Enjoy a greater level of home entertainment realism than ever before. Thanks to a resolution twice as high as standard HD TVs, your Samsung Smart TV delivers a breathtaking viewing experience that takes you beyond the screen into a world of total immersion. When you've seen the rich and vivid texture of Full HD images, your favourite TV programmes and movies will never be the same again. Discover reality with a full high definition experience.

Stay in closer contact with great widescreen Skype video calls
Stay in touch with friends and family from the comfort of your home thanks to the Skype app for Smart TV, available for free in the Samsung App store. Combined with the separately-sold Skype camera kit, it allows you to make high-quality widescreen video calls to loved ones throughout the world at low rates or even for free. You can create new Skype accounts, access existing ones and navigate using your TV's remote control. Be closer with face-to-face communication.

Watch movies from your USB
With ConnectShare Movie, simply plug your USB memory drive into the TV and instantaneously enjoy movies, photos or music. Now, you can experience a wide variety of content in the comfort of your living room on your TV.

Bringing a full multimedia experience into your living room
With High Definition Multimedia Interface (HDMI) inputs, the Samsung TV will transform your living room into a multimedia entertainment centre. HDMI provides high-speed transmission of high definition digital data from multiple devices straight into your TV.
