Asus Geforce GTX780-Strix-oc-6GD5 6Gb/6144mb DDR5 384bit Graphics Card

Product Overview

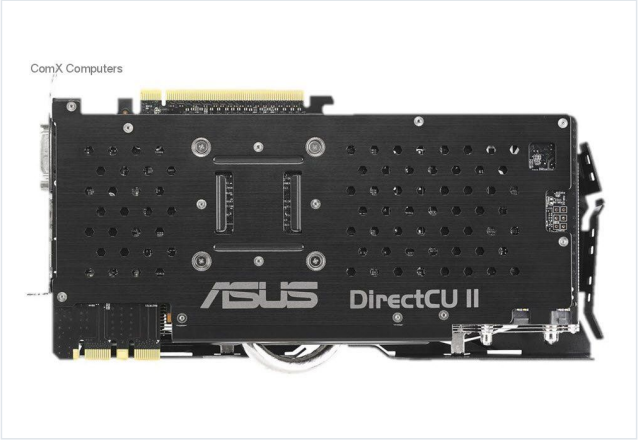

Asus GTX780-Strix-oc-6GD5, DirectCU 2(ii) with dual fan design back-sided heatsink 10mm copper heatpipes, support 0dB silent mode, DIGI VRM with 10-phase Super Alloy Power, Geforce GTX780, 28nm, 3-way SLi support, Pci-E 3.0 16x, support Adaptive Vertical Sync, support 4xdisplay, FXAA TXAA; 6Gb/6144mb DDR5 384bit, RoPs: 48, 288.4Gb/sec memory transfer, 2304 cuda cores (pixel shader engine vertex pipelines), 3977GFLoPS, 166GTexels/Sec, 192x TMUs, core clock: 889/941mhz; memory: 6008mhz, 2x dvi 1x HDMi 1x DP

Specifications

Overview:

Strix GTX 780 is the new gaming graphics card from ASUS for those who survive on the very edge of instinct. Equipped with the powerful GeForce® GTX 780 GPU, Strix GTX 780 delivers 38%-cooler operation and the ability to play in complete silence! Exclusive DirectCU II technology keeps things super-cool while our new 0dB silent-fan technology means you can enjoy total peace - even when playing games at HD resolutions of up to 1920 x 1080 pixels and with a GPU temperature of up to 65 degreesC! Strix GTX 780 also benefits from DIGI , an exclusive voltage-regulation module (VRM) for incredible stability and reduced noise. You also get GPU Tweak, a brilliant utility that teases maximum performance from the GPU and lets you live stream your enhanced gameplay!

Features:

DirectCU II with 0dB Fan Technology 38% cooler. Silent gaming.
Exclusive DirectCU II cooling technology outperforms reference designs with an exclusive 10mm heatpipe that transports 40% more heat away from the GPU - a first for the industry! The design also includes 220%-larger heat-dissipation: this means performance that's 38% cooler and three-times (3X) quieter than reference for ultra-stable hardcore gaming with very low noise. And Strix ups the ante still further with 0dB fan technology that lets you enjoy games like League of Legends® and StarCraft® in complete silence - because the card's thermal design is able to keep GPU temperature below 65 degreesC, so the fan stops completely!

DIGI VRM with Super Alloy Power 30% less power noise and 2.5X greater durability
Acclaimed DIGI VRM has been applied via a 10-phase power design that uses digital voltage regulators to minimize power noise by 30%, enhance power efficiency by 15%, widen voltage modulation tolerance, and improve overall stability and longevity by 2.5 times over reference.

GPU Tweak with Streaming Real-time intuitive graphics tuning

- Shows detailed specs and actual card status with GPU-Z
- Monitoring widget provides real-time detailed multi-parameter info
- Automatically checks and updates drivers and BIOS versions

Stream online instantly
GPU Tweak streaming tool that lets you share on-screen action in real time - so others can watch live as games are played. It's even possible to add to the streaming window scrolling text, pictures and webcam images.
