SC-AA2SBR-3

Asus 2-way high-bandwidth 3 slots SLI Bridge

Product Overview

Asus ROG-SLi-HB-BRiDGE-3SLOT - 2-way high-bandwidth SLI Bridge 3 slots (1 slots spacing between cards) - with RGB led for aura sync with 12x color schemes , touch-sensitive lighting panel - designed for GTX1070/1080/Titan-X

Specifications

Features:

Gaming Performance, Brilliantly Boosted.
The all-new ROG SLI HB (High-Bandwidth) Bridge doubles the available transfer bandwidth of the previous generation to deliver gloriously detailed graphics and silky smooth gameplay. Support for multiple 2-way configurations - both 3-slot and 4-slot - provide maximum flexibility. ROG SLI HB Bridge features ASUS-exclusive Aura RGB lighting that displays millions of colors to express your unique gaming style, and Aura Sync technology that perfectly synchronizes lighting for a system that really shines.

Ideal for 2-Way SLI Configurations
ROG SLI HB Bridge is compatible with variety of 2-way SLI configurations for maximum flexibility.
ROG-SLI-HB-BRIDGE-3SLOT supports 3-slot configurations, while ROG-SLI-HB-BRIDGE-4SLOT supports 4-slot configurations.

High-Bandwidth NVIDIA® SLI Bridge Doubles Transfer Bandwidth
Dual-link SLI mode is supported with a new NVIDIA SLI Bridge called NVIDIA SLI HB. The all-new ROG NVIDIA SLI HB Bridge facilitates high-speed data transfer between GPUs and double the available transfer bandwidth compared to the SLI interface used on prior generation GeForce GTX GPUs. The result is silky-smooth gameplay - especially in high resolutions like 4K, 5K, and surround - enabled by the latest generation of compatible ASUS gaming graphics cards.

Aura RGB Touch-Sensitive Lighting Panel
ROG SLI HB Bridge features ASUS-exclusive Aura RGB lighting that automatically displays millions of colors in a repeating loop. Touching a specific color on the lighting panel will display it constantly, and another touch will resume the loop. Up to 12 different lighting effects* can also be displayed and controlled using the GeForce Experience software.

Aura Sync
When paired with an Aura Sync-enabled gaming motherboard by attaching the external 4-pin cable to the onboard RGB header, ASUS Aura Sync technology perfectly synchronizes the lighting for a system that really shines.

PERFECT FIT WITH ASUS GRAPHICS

ROG SLI HB Bridge is compatible with all GeForce® GTX Titan X, 1080, and 1070 graphics cards.
