Specifications

Features:

WindForce 2X Anti-turbulence-Parallel inclined
WINDFORCE 2X parallel-inclined fin design is equipped with 2 ultra quiet PWM fans and copper heat pipe to enlarge air channel on the graphics card vents and creates a more effective airflow system in chassis.

Lower GPU Temperature
Ultra Durable VGA board provides dramatic cooling effect on lowering both GPU and memory temperature by doubling the copper inner layer of PCB.

Better Overclocking Capability
Ultra Durable VGA board reduces voltage ripples in normal and transient state, thus effectively lowers noises and ensures higher
overclocking capability.

Decrease Power Switching Loss
Ultra Durable VGA board allows more bandwidth for electron passage and reduces circuit impedance. The less circuit impedance, the more stable flow of current and can effectively improve power efficiency.

OC GURU II
Brand-new instinctive user interface, easier to monitoring and adjusting all important settings. Users can set up MONITORING, GPU CLOCK, MEMORY CLOCK,FAN, OSD, ONLINE SUPPORT and update driver, BIOS directly.
