Specifications

Overview:

The JUA254 USB™ to HDMI™ Multi-Monitor Adapter works as an external video card, instantly allowing users to attach additional displays via HDMI™ connection without the hassle of a lengthy setup or having to install additional hardware. The USB™ 3.0 Display Adapter can support up to four displays running on the same computer, turning your workstation into a fully-functioning, multi-display powerhouse. This USB™ adapter works as an external video card, instantly allowing additional displays without the hassle of opening the computer casing and installing an external graphics card. You can have a second monitor with an extended display, a mirrored display, a rotational display (rotation mode not available for Mac®), or make it your primary monitor. Now enjoy true 1080p HD resolution through any Windows® or Mac® computer with a USB™ 3.0 port. These adapters are also backwards compatible with USB™ 2.0 resolutions and playback, which are ideal for office applications. The simple plug-and-play function allows you to connect your computer to a second monitor or projector within seconds to create a new visual environment on Windows® 10.

Features:

- Easily add an additional display through the USB™ 3.0 and HDMI™ connection
- Video playback performs at 1080p HD with a resolution up to 2048x1152
- Add an additional monitor without adding an expensive, internal video card and avoid complicated installation.
- Hot-swappable USB™ enables you to add or remove monitors without rebooting your system
- Move and view your large documents across two screens without overlapping windows
- Multitask with larger landscape/desktop space
- Ideal for viewing multiple windows at the same time
- Great for multitasking in a wide variety of fields including: call centers, stock markets, hospitals, graphic design, editing, accounting, etc.
- A must-have for surfing the web and working on your email and social media accounts at the same time.

System requirements:

ComX Computers
