

SC-M950G2G

MSI NVIDIA GeForce GTX 950 2048Gb GDDR5 128-bit Graphics Card

Product Overview

MSI NVIDIA GeForce GTX 950 2048Gb GDDR5 128-bit Graphics Card, 1 x DVI-I, 1 x HDMI, 3 x DisplayPort

Specifications

Features:

THE ULTIMATE PC GAMING PLATFORM

Get Game Ready with GeForce® GTX. GeForce GTX graphics cards are the most advanced ever created. Discover unprecedented performance, power efficiency, and next-generation gaming experiences.

EXCLUSIVE GAMING TECHNOLOGIES

Cutting-edge physics and lighting for realism and immersive visuals on popular games like Witcher 3

A BETTER GAMING EXPERIENCE

The easiest way to update your drivers, optimize your games, and share your victories

STUTTER, TEAR-FREE GAMEPLAY

Synchronizes the display refresh to your GeForce GTX GPU for the fast, smooth gaming

TWIN FROZR V - COOLER, QUIETER, BETTER GAMING

With every new generation of GPUs comes more performance. With every new generation of MSI Twin Frozr, we give you less noise and heat! We've listened to all your requests and the new Twin Frozr V is smaller, features stronger fans, generates less noise, keeps your graphics card and its components cooler and matches perfectly with your MSI GAMING motherboard including some funky LED lighting. We've spent 18 months on the development of the Twin Frozr V, including field testing in gaming cafés to ensure the cards have the quality and stability to give you the FPS you need!

Traditional Fan Blade

Maximizes downwards airflow and air dispersion to the massive heat sink below them.

Dispersion Fan Blade

Intake more airflow to maximizes air dissipation to heat sink.

AIRFLOW DIAGRAM

ComX Computers

Product Specification Sheet

Advanced Dispersion Blade design generates 19% more airflow without increasing drag for supreme silent performance.

AIRFLOW CONTROL

Enhanced dissipation efficiency. MSI has fitted Twin Frozr coolers with the all new Airflow Control technology which guides more airflow directly onto the heat pipes by using special deflectors on the heat sink. In addition, this exclusive heat sink design increases heat sink surface area, greatly enhancing the dissipation efficiency.

SU PIPE

SU Architecture is the best cooling solution for graphics cards. The GPU is cooled by a massive nickel-plated copper base plate connected to heat pipes on the MSI GAMING series graphics card. Additionally, the new heat pipe layout increases efficiency by reducing the length of unused heat pipe and a special SU-form design.

ZERO FROZR

Smart cooling, stay quiet. MSI's Twin Frozr V Thermal Designs are equipped with ZeroFrozr technology which was first introduced by MSI back in 2008. ZeroFrozr technology eliminates fan noise in low-load situations by stopping the fans when they are not needed. Compared to other graphics cards, there is no continuous hum of airflow to tell you there's a powerful graphics card in your gaming rig. This means you can focus on gaming without the distraction of other sounds coming from your PC.

Catching the vibe with cool LED effects

Featuring a premium LED illuminated MSI GAMING Dragon to lighten the mood. This brand new function allows you to choose from 5 unique modes to set the right ambience for your gaming moments with just one click.

GAMING APP

The MSI Gaming App allows for one-click performance profiles that unlock extra performance for gaming or keep your card silent during light use. It also features the EyeRest tab, giving you easy access to image quality improving technology. The LED control tab gives you full control over your MSI GAMING LED lights to set the mood.

OC Mode

Maximum Performance through higher clock speeds and increased fan performance

Gaming Mode (Default)

The best balance between in-game performance and thermal

Silent Mode

The best environment for minimal fan noise

MSI GAMING APP EYEREST TAB

Quickly adjust display settings to your visual needs. Expand the tab by clicking on the "eyecon" and select your preferred setting.

EYE REST MODE

Helps you sleep and rest better by reducing the blue light balance of your screen to let your body acclimatize to the night time.

GAMING MODE

More intense colors and increased contrast let you live the gaming life as the creators meant it.

MOVIE MODE

Dynamically adjusts Gamma and Contrast ratios for the clearest movie viewing experience

ON-SCREEN SPEED & TEMPERATURES

Real-time monitor GPU Core, DRAM Frequency, GPU & CPU Temperatures and much more, in game or in other fullscreen

applications, customizable to your preference.

A DIFFERENT VIEW ON GAMING

MSI Dragon Eye allows you to watch a YouTube video or Twitch Stream while playing a game simultaneously. Simply add a link or stream to the Dragon Eye application and select the size, position, volume and transparency and start gaming. With a few hotkeys you can start/pause your video or set the volume.

SLI GAMING

The only thing better than gaming with one MSI GeForce® GTX 900 GAMING series graphics card is to have two or more running in SLI. The 2Way SLI Bridge L is the perfect link for your ultimate MSI GAMING SLI setup. Equipped with a premium LED illuminated GAMING logo, that can be synchronized to show the same effects as your MSI GeForce® GTX 900 GAMING graphics cards. Optimized for 4K+ resolutions and 144Hz+ refresh rates, the MSI GAMING SLI bridge is ready for next generation gaming!

MORE PERFORMANCE

MSI GAMING Graphics Cards give you more performance out of the box. Whether you use the card pre-overclocked or use the Gaming App to use its full potential, you can just get right into the game and enjoy sublime performance. Overclocking through the MSI Gaming App is covered by warranty to take away your worries. Get in there and start winning!

MILITARY CLASS COMPONENTS

One of the deciding factors in performance is the quality of the components used. That is why MSI only uses MIL-STD-810G certified components for its Gaming cards because only these components have proven to be able to withstand the torturous circumstances of extreme gaming and overclocking.

HI-C CAP

MSI's Hi-c CAPs are tiny, and super-efficient capacitors. Their small footprint allows the installation of heat sinks and their high efficiency (93%) actually reduces the total thermal footprint of the card.

SUPER FERRITE CHOKES

Super Ferrite Chokes use a Ferrite core that is Super-Permeable. This allows the Super Ferrite Chokes to run at a 35 degree Celsius lower temperature, have a 30% higher current capacity, a 20% improvement in power efficiency and better overclocking power stability.

SOLID CAP

With their aluminum core design, Solid CAP's have been a staple in high-end design mainboard designs and provides lower Equivalent Series Resistance (ESR) as well as its over-10-year lifespan.

AFTERBURNER

MSI Afterburner is world's favorite cross-vendor GPU overclocking tool. The easy interface gives access to the most detailed information about your graphics card and allows for tinkering with pretty much anything available on your graphics card. Compatible with 64-bit Apps, available in many languages, including, Russian, Spanish, Chinese and Korean and completely customizable with many user-generated skins, everyone feels at home. You can also run Afterburner on your iOS or Android smartphone and the built-in benchmarking utility Kombustor gives you insight in your Graphics Cards' true performance.

PREDATOR

A built-in screen and video capturing tool named Predator which captures your screen as still images or videos with the push of a button and allows you to capture and record your coolest, goofiest and most awesome gaming moments on your PC!

WTFast

WTFast is the Gamers Private Network ; like a global automated army of IT specialists all working together to optimize your game connection from end to end. WTFast reports rich connection stats for your online game, so you can see exactly what is happening with your game connection.

Specifications

Product Code	SC-M950G2G
Graphics Processing Unit	NVIDIA GeForce GTX 950
Interface	PCI Express x16 3.0
Core Clocks	1317 MHz / 1127 MHz (OC Mode)
	1279 MHz / 1102 MHz (Gaming Mode)
	1190 MHz / 1026 MHz (Silent Mode)
Memory Speed	6650 (OC Mode) / 6610
Memory Size	2048
Memory Type	GDDR5
Memory Bus	128-bit
HDCP Support	Y
Power consumption	90
Power connectors	6-pin x 1
Recommended PSU	350
Card Dimension(mm)	270 x 137 x 37
Weight (Card / Package)	602
DirectX Version Support	12
OpenGL Version Support	4.5
Multi-GPU Technology	SLI, 2-way
Maximum Displays	4
DVI Connectors	1 (Dual-link DVI-I), Max Resolution: 2560 x 1600 @60 Hz.
HDMI Connectors	1 (version 1.4a/2.0)
	Max Resolution: 4096x2160 @24 Hz (1.4a), 3840x2160 @60 Hz (2.0)
DisplayPort	3 (version 1.2)
	Max Resolution: 5120x3200 @60 Hz with dual DisplayPort connectors
RAMDAC speed (MHz)	400
Accessories	DVI to VGA Dongle x 1
