SDIXD0N-256G-GN6TP

SanDisk Creator Phone Drive 256GB USB 3.2 Gen 1 Type-C and Lightning connectors

Product Overview

SanDisk Creator Phone Drive 256GB USB 3.2 Gen 1 Type-C and Lightning connectors, SDIXD0N-256G-GN6TP

Specifications

Overview Summary:

The SanDisk Creator Phone Drive 256GB is a compact storage solution for creators who need to move, back up and manage files across compatible smartphones, tablets and computers. With USB Type-C and Lightning connectors, it makes transferring photos, videos and documents between devices simple and convenient.

Its 256GB capacity provides extra space for creative content and everyday files, making it a practical choice for mobile workflows. Buy now and shop now for reliable portable storage in South Africa.

Performance tier: Mid-range

Uses: Photo storage, video storage, file transfers, mobile backups, content creation, document storage

Overview:

SanDisk Creator Phone Drive 256GB USB-C and Lightning
The SanDisk Creator Phone Drive 256GB is designed for creators who regularly move photos, videos and other files between smartphones, tablets and computers. With both USB Type-C and Lightning connectors, this compact storage drive makes it easier to transfer and manage content across compatible devices without relying solely on internal storage.

The drive provides up to 256GB of additional storage, making it useful for high-resolution photos, long-form videos, documents and other large files. Its USB 3.2 Gen 1 interface supports fast and convenient file transfers, while the compact metal design provides a durable storage solution that is easy to carry.

Description:

The SanDisk Creator Phone Drive combines portable storage with a dual-connector design aimed at modern creative workflows. Connect directly to compatible iPhone, iPad, Mac and USB Type-C devices to move, copy or back up your content wherever you are. This makes the drive a practical choice for photographers, videographers, content creators and users who need extra mobile storage.

The SanDisk app can help simplify the process of backing up and moving photos and videos between compatible devices. With 256GB of capacity, there is plenty of room for expanding mobile storage and keeping important creative files accessible when needed.

A three-month Adobe Lightroom membership is also included with the purchase, giving creators access to additional tools for editing and organising photos.

Features:

Portable Storage for Creative Workflows
The SanDisk Creator Phone Drive is part of the SanDisk Creator Series, designed to support content creators throughout their workflow. Instead of transferring files through cloud storage or constantly managing limited phone capacity, the drive provides a direct storage and transfer option.

Its dual-connector design is particularly useful when working across different devices. USB Type-C provides compatibility with many modern smartphones, tablets, laptops and computers, while the Lightning connector supports compatible Apple devices.

256GB Extra Storage for Photos and Videos
With up to 256GB of storage, the drive provides additional space for large collections of photos, videos, documents and other digital content. It can be useful when recording high-resolution video, storing large media libraries or freeing up space on a smartphone.

Key storage details include:

- Capacity: 256GB
- Interface: USB 3.2 Gen 1
- Connectors: USB Type-C and Lightning
- Product series: SanDisk Creator Series
- Model number: SDIXD0N-256G-GN6TP

USB Type-C and Lightning Connectivity
The combination of USB Type-C and Lightning connectors allows users to transfer content between compatible mobile devices and computers using a single portable drive. This is especially useful for creators who switch between smartphones, tablets and desktop or laptop computers during editing and content management.

The drive can be used to move photos, videos and documents between supported devices, helping simplify file management when working away from a main computer.

Easy Content Backup and Transfer
Compatible users can use the SanDisk app to back up, copy and move photos and videos. This provides a convenient way to manage content and create additional copies of important files without depending entirely on online storage.

For creators working with large media files, having portable physical storage can also make it easier to keep frequently used content available while travelling or working on location.

Compact Metal Design
The SanDisk Creator Phone Drive features a robust metal construction with a compact form that is suited to mobile use. Its portable design allows it to be carried alongside a smartphone, tablet or laptop, making extra storage readily available when required.

The design also adds a distinctive look while providing a practical solution for everyday file transfers and storage.

Adobe Lightroom Included
Purchase of the SanDisk Creator Phone Drive includes a three-month Adobe Lightroom membership. This provides creators with access to Lightroom tools for editing and organising photographs, adding extra value for users who are building a mobile photography or content creation workflow.

SanDisk Creator Phone Drive 256GB Details

- Model number: SDIXD0N-256G-GN6TP
- Part number / SKU: SDIXD0N-256G-GN6TP

Who Is the SanDisk Creator Phone Drive For
This 256GB SanDisk USB drive is a practical option for photographers, videographers, social media creators and everyday users who need additional storage for mobile devices. It is particularly useful for transferring large media files between compatible Apple devices and USB Type-C computers or mobile devices.

Whether you need to free up smartphone storage, back up important photos, transfer videos for editing or carry additional files while travelling, the SanDisk Creator Phone Drive provides a compact and versatile storage solution.
