Specifications

Overview:

Kaspersky Internet Security - Multi-Device* provides premium protection for computers, tablets and phones. It combines ease of use, plus innovative security technologies - to protect your privacy, money, identity & kids against today's complex viruses and online dangers.

Features:

SECURITY - Protects against viruses, spyware, Internet threats and more
Hundreds of thousands of new malware items are being unleashed by cybercriminals… every day. That's why our cloud-assisted security continually adds to your defenses against malware and Internet dangers. We also block banner adverts and let you filter out annoying spam messages.

PC, MAC & MOBILE - Secures any combination of PCs, Mac & Android devices
Whichever device you use to go online, our innovative security technologies deliver multi-layered protection. Furthermore, because it's easy to lose mobile devices, we've included anti-theft features that let you lock, wipe and locate lost or stolen Android devices.

PRIVACY - Safeguards your privacy and defends against identity theft
Phishing attacks are automatically blocked - plus our Webcam Protection* technology stops criminals using your own webcam to spy on you. We also prevent the tracking* of your web browsing habits and the capture of your personal information.

MONEY - Adds extra layers of security for online banking & shopping
Whenever you use your PC or Mac to visit a banking, shopping or payment website, our unique Safe Money technology

checks that the site is secure, ensures you're not being tricked by a fake site and then opens the website in a special, protected mode.

KIDS - Helps you keep your kids safe from Internet dangers & more
Award-winning Parental Control features - running on your PC or Mac - make it easy for you to manage your kids' app downloads, prevent access to inappropriate web content & games, manage messaging on social networks and prevent disclosure of personal information.

PERFORMANCE - Delivers world-class security… without slowing you down**
Our security technologies combine protection & efficiency - so they work 'behind the scenes', without slowing down your 'digital life'.

SIMPLICITY - Simplifies security management… across all your devices
A free My Kaspersky account lets you manage your security - across all your computers, tablets & phones - from anywhere that you can access the Web. You can check each device's security & license status and adjust key security settings*** - plus access special offers and download free Kaspersky Lab products. My Kaspersky also gives you easy access to technical support.
