Symantec Protection suite Small Business Edition

Product Overview

Symantec Protection suite Small Business Edition - 25 users , with Endpoint Security , Messaging Security , Backup and Recovery - reatil pack

Specifications

Overview:

Symantec Protection Suite Enterprise Edition is powered with Symantec Insight and protects with the industry's fastest, most-effective endpoint security, combined with industry-leading messaging protection and innovative web security.

Deeper insights and simplified work processes:
Symantec global intelligence network integration provides deeper insight into local and global threat landscape. Prebuilt workflow templates simplify work processes and automation while you can also use the same console to manage windows and mac clients.

Fastest, most-effective endpoint security:

- Symantec insight - separates files at risk from those that are safe, for faster and more accurate malware detection.
- Real time sonar 3 - examines programs as they run, identifying and stopping malicious behavior even of new and previously unknown threats.
- Built for virtual environments: enhanced features to help protect your virtual infrastructure and automatically identify and manage virtual clients.

Features:

- Fastest, most-effective protection, powered by symantec insight, for laptops, desktops, servers, messaging and web gateways--protection beyond antivirus.
- Catch more than 99% of spam and prevent data loss with advanced content filtering to identify and control the flow of sensitive data in email and im.
- Web gateway security that protects against web threats, including malicious software, spyware, botnets, viruses, and malware.
- Rapid data and system recovery recovers individual files and folders in seconds or complete windows systems in minutes to dissimilar hardware or virtual environments.

Key benefits

- Multiple layers of protection from the market-leading endpoint security, messaging security, web, data loss prevention, and data and system recovery vendor.
- Eliminates environment complexity by deploying integrated essential endpoint and messaging security technologies as unified solutions with coordinated management.
- Automatic controls help you achieve, prove, and enforce adherence to it policy and regulatory objectives with ease.
- Simplified implementation & operations by quickly deploying with minimal disruption to your environment through easy management and optimized utilization of system resources.
- Centrally manages backup and recovery tasks for multiple desktops/laptops across your entire organization.
- Instant threat protection with support from the largest global intelligence network in the world.
- Comprehensive virus protection against malicious threats that target windows, linux and macintosh systems.
