Specifications

Overview:

Devastator 3 Plus - A Gaming Combo With Color

The Devastator 3 Plus Combo is the next generation of our popular gaming keyboard and mouse set. The ergonomic ultra-flat mouse features an adjustable DPI up to 2400 and high-precision mouse wheel, while the low-profile keyboard comes with laser-etched, grip coated keys and Mem-chanical Switches for improved tactile feedback. And now with 7 different LED options, you can customize your peripherals to match all of your hardware in style.

Features:

Exclusive Hybrid Linear Mem-chanical Switches

Outfitted with our exclusive hybrid switches and engineered in-house to boost your performance in-game, the Devastator 3 Plus features specially designed linear switches, similar to those found in professional-level mechanical keyboards. The result is a membrane keyboard thats fine-tuned to help you win all your battles.

Ergonomic Styling From Top To Bottom

The Devastator 3 Plus Combo is designed to be comfortable to use in all circumstances. The mouse is ergonomically pleasing, with an ultralow flat profile for convenience and a large mouse wheel for ease of use. The keyboard also features an ultralow profile for decreased strain, while antislide rubber pads underneath prevent slippage during heated battles.

A Precision Mouse To Elevate Your Game

The MM110 mouse enclosed in our combo is custom-tailored for hardcore serious gaming. It has durable Kailh switches, good for 10 million precise keypresses, and an Avago optical sensor that's optimized specifically for going on a killing spree.

7 Colors For Customized Presonality

The mouse and keyboard in the Devastator 3 Plus Combo are RGB capable, with seven different backlight options to choose from. Personalize your setup with custom color pairings to mix and match to your other PC accessories. And if you ever want to switch colors, it's as easy as a press of the Fn button.

Functional and Durable

The rugged combo is meant to last you through the most stressful skirmishes. Rubber side grips on the mouse improve stability and minimize wear and tear, while the keycaps on the keyboard are laseretched and gripcoated for minimal wear and optimal functionality. These peripherals just work.
