# SONY STR-DN1040

SONY STR-DN1040 7.2 Channel AV Receiver/Amplifier

## Product Overview

SONY STR-DN1040, 7.2 Channel, AV Receiver, Core Series 7.2 channe, I4K Resolution, HDMI inputs, Network connectivity.

## Specifications

### Overview

Connect up to 7 speakers and 2 subwoofers and enjoy powerful surround sound for your TV, Blu-ray and DVD movies, PlayStation, CD music collection and FM/AM tuner. The only thing better is the added benefit of streaming music from your PC, iPod/iPhone or Internet radio stations.

### Features

- 120W RMS per channel (6 Ohms, 1kHz, 2ch driven, 1% THD)
- Built-in Wi-Fi for DLNA, Airplay and vTuner network services
- 4K up-scaling
- 2nd zone audio
- HDMI inputs x 8
- Advanced GUI

### WiFi

Enjoy convenient internet connections with Wi-Fi Integrated and Wi-Fi Ready models. These features enable you to use the BRAVIA Internet TV & Widgets without any additional wires and lets you experience true freedom from cumbersome and messy cables

### HDMI

HDMI (High-Definition Multimedia Interface) is the first and only industry-supported, uncompressed, all-digital audio/video interface. By delivering crystal-clear, all-digital audio and video via a single cable, HDMI dramatically simplifies cabling and helps provide consumers with the highest-quality home theater experience. HDMI provides an interface between any audio/video source, such as a set-top box, DVD player, or A/V receiver and an audio and/or video monitor, such as a digital television (DTV), over a single cable.

HDMI supports standard, enhanced, or high-definition video, plus multi-channel digital audio on a single cable. It transmits all ATSC HDTV standards and supports 8-channel, 192kHz, uncompressed digital audio and all currently-available compressed

formats (such as Dolby Digital and DTS), HDMI 1.3 adds additional support for new lossless digital audio formats Dolby TrueHD and DTS-HD Master Audio with bandwidth to spare to accommodate future enhancements and requirements
