Specifications

About this product

The Fujitsu ScanSnap SV600 is a contactless overhead document scanning solution designed to digitize books, magazines, bound documents, photographs, business cards and loose papers without direct contact. Supporting document sizes from below A8 up to A3 and document thicknesses up to 30mm, it delivers flexible scanning for offices, libraries, schools and archives. Buy now from our website for a fast and efficient document digitization solution.

Overview Summary

Fujitsu ScanSnap SV600 Contactless Overhead Scanner

The Fujitsu ScanSnap SV600 is a versatile overhead scanner that captures documents from below A8 up to A3 size without requiring direct contact with the original material. Its overhead scanning design makes it ideal for scanning books, magazines,

historical records, bound documents and fragile materials that cannot be fed through a traditional scanner.

Designed for professional and personal document management, the SV600 supports documents up to 30mm thick and includes software for Windows and Mac OS to streamline document organization, OCR processing and business card management. The included black background desktop pad improves scanning consistency while USB connectivity enables simple integration into existing workspaces.

Performance tier: Professional Document Scanning

Uses: Book scanning, document archiving, business card digitization, office document management, educational records, library digitization, photograph scanning.

Overview

This overhead scanner is perfect for scanning books, artwork and other fragile items. The ScanSnap SV600 is a revolutionary award winning design that uses overhead scanning for instant digitisation of traditionally difficult to scan books, pictures, bound documents, and 3D or fragile items; it's even safe for those which are sensitive to UV light.

Description

The Fujitsu ScanSnap SV600 is engineered to provide efficient and non-contact document capture for a wide range of materials. Unlike conventional flatbed or sheet-fed scanners, the overhead design allows users to scan bound books, magazines, journals and delicate documents without damaging pages or bindings.

Supporting document formats from below A8 up to A3, the scanner accommodates everything from business cards and receipts to large-format documents. Its ability to handle document thicknesses of up to 30mm makes it particularly useful for libraries, educational institutions, legal offices, accounting departments and archival environments.

The included software suite enhances productivity by enabling document organization, OCR text recognition, business card management and PDF creation. Compatibility with both Windows and Mac OS platforms provides deployment flexibility across different environments. The supplied black background desktop pad further improves scan quality and document recognition during operation.
