Specifications

Summary Overview:

Enhance your typing experience with the Keychron Cherry Profile Dye-Sub PBT Full Set Keycap Set in the striking Cyber Developer colourway. Designed specifically for South African tech enthusiasts and developers, this 133-piece set transforms your mechanical keyboard into a focused workspace companion featuring dark navy and black tones accented by vibrant purple highlights.

Constructed from durable dye-sublimated PBT material with a refined Cherry profile, these keycaps ensure consistent texture and longevity for daily use. Compatible with all MX-style stem switches and ANSI layouts ranging from 65% to full-size, this upgrade offers the perfect blend of aesthetics and functionality without compromising on quality.

Ready to refresh your setup? Buy now to experience a cohesive typing feel that matches your professional style and elevate your home office or workspace today.

Performance tier: Premium

Uses: Typing, coding, gaming, office work, programming, desk customization

Overview:

Elevate your typing experience with the Keychron Cherry Profile Dye-Sub PBT Full Set Keycap Set in the striking Cyber Developer colourway. Designed for enthusiasts who demand both style and durability, this 133-piece collection transforms standard mechanical keyboards into a cohesive masterpiece. The set features a sophisticated blend of dark navy and black keys accented with vibrant purple highlights, creating a professional yet distinctive aesthetic perfect for developers and gamers alike.

Description:

This comprehensive keycap kit is engineered to provide an immediate upgrade for your mechanical keyboard setup without the hassle of sourcing individual pieces. Crafted from high-quality dye-sublimated PBT plastic, it ensures long-lasting legends that resist shine even after years of heavy use. The Cherry profile offers a comfortable, familiar typing curve suitable for all-day sessions, while the universal compatibility allows you to refresh boards ranging from compact 65% layouts to full-size 100% configurations. Whether you are building a custom rig or simply refreshing an existing desk setup in South Africa, this set delivers a premium look and feel.

Features:

Why This Keycap Set Stands Out

The Cyber Developer edition is more than just a colour change; it is a complete overhaul of your keyboard's visual identity. Unlike partial sets that leave gaps or mismatched keys, this 133-piece pack ensures every single key on your board matches perfectly. The dye-sublimation process embeds the legends deep into the plastic, guaranteeing they will not fade or wear off over time. Combined with the robust PBT material, you get a tactile surface that feels substantial and resists oil buildup from frequent typing.

Compatibility and Layout

One of the most significant benefits of this set is its versatility across popular keyboard sizes. It is specifically designed for MX style stem switches and ANSI layout keyboards, making it a safe choice for a wide variety of mechanical boards. The package includes all necessary keys to cover 100%, 96%, 80%, 75% and 65% formats, ensuring you have the correct size keycap for every position on your board.

If you are looking for the specific part number

T74

, this is the exact SKU required to order this complete Cyber Developer set. You can easily identify it by its unique navy and black colour scheme with purple accents, which stands out against standard grey or white keycaps.

FAQ

Which keyboard layouts are compatible with this keycap set?

The Keychron Cherry Profile Dye-Sub PBT Full Set Keycap Set - Cyber Developer is designed for ANSI layout keyboards in 100%, 96%, 80%, 75% and 65% sizes, making it a versatile choice for everything from compact boards to full-size setups.

What type of switches do these keycaps fit?

This set features MX style stem compatibility, allowing you to install the caps directly on compatible mechanical keyboards without needing adapters or hunting for specific switch types.

How many keys are included in this full set?

The package contains 133 pieces, providing a complete collection of keycaps to refresh your entire keyboard at once rather than upgrading individual keys over time.

What is the material and profile of these keycaps?

Made from durable dye-sub PBT, these keycaps feature a Cherry profile for a refined typing surface and uniform look across all 133 pieces in the pack.

Does this set include any adapters for non-MX switches?

No, the product is specifically designed to fit MX style stem switches only; no additional adapters are included or required for compatible keyboards.
