Specifications

Overview Summary:

The TP-Link Tapo S112 Smart Wi-Fi Switch Module offers seamless smart home control, letting you manage two lights or devices independently with Wi-Fi or Bluetooth connectivity. Designed for simple installation, it fits behind existing switches and works perfectly with major platforms like Alexa, Google Home, and Apple Home. With energy monitoring, flexible control modes, and Matter compatibility, this compact device brings convenience, safety, and efficiency to your home automation system. Buy now to enjoy smarter living with full control from anywhere.

This switch module is ideal for South African homes looking to upgrade their lighting and automate everyday routines. Whether you're managing roller shutters, floor heating, or smart lighting, the Tapo S112 makes it easy to save energy while maintaining comfort. Shop now to experience modern automation that works effortlessly across your smart ecosystem.

Performance tier:Premium

Uses:Smart lighting control, roller shutter automation, outlet management, energy monitoring, smart home integration

Overview:

TP-Link Tapo S112 Smart Wi-Fi Switch Module

Smart Switch Module 2 | 2.4GHz Wi-Fi | Bluetooth | Dual Light Control | Energy Monitoring

The Tapo S112 Smart Wi-Fi Switch Module by TP-Link brings intelligent automation to your home, allowing you to control two lights or devices independently, track energy usage, and enjoy compatibility across major smart ecosystems. Designed for flexibility, compact installation, and reliable safety, it's the perfect choice for upgrading existing switches without replacing your setup.

Description:

The TP-Link Tapo S112 is a dual-channel smart switch module that supports both roller shutter and standard switch modes. With Wi-Fi and Bluetooth connectivity, users can remotely manage connected lights, outlets, or shades through the Tapo app or voice assistants like Alexa and Google Home. Energy monitoring, safety protections, Matter compatibility, and zero-crossing technology ensure efficient performance, long-lasting durability, and seamless integration with your smart home.

Features:

Smart Control for Daily Convenience

The Tapo S112 gives users multiple ways to manage connected devices for added comfort and automation.

- Remote control devices anytime through the Tapo app.
- Create schedules and timers to automate lighting and roller shutters.
- Use voice commands for hands-free control.
- Set up custom scenes and routines for daily activities.

Dual Relay Design for Independent Control

The module includes two relays, allowing separate control of two different lights or devices. This dual setup offers flexible automation and improved efficiency, ideal for both lighting and appliance management.

Flexible for Multiple Applications

The Tapo S112 operates in two modes for versatile integration:

- Roller Mode- Automate roller shutters or blinds to open and close on schedule.

ComX Computers

Product Specification Sheet

- Switch Mode- Control smart lighting, wall outlets, or electric floor heating systems.

Examples include:

- Roller shade automation for morning wake-ups.
- Smart light switch setup for multiple rooms.
- Energy-efficient outlet control.
- Temperature management with electric floor heating.

Monitor and Manage Energy Consumption

Each channel of the Tapo S112 provides detailed power usage data. View real-time and historical consumption through the Tapo app, set electricity rates, and identify opportunities to save on your energy bills.

Note: Energy monitoring is unavailable when powered by DC.

Compatible Across All Major Platforms

With Matter support, the Tapo S112 works with Apple Home, Alexa, Google Home, Samsung SmartThings, and IFTTT. This ensures smooth integration and unified control, even across mixed-device environments.

Durable Design with Extended Lifespan

The Tapo S112 incorporates industrial-grade zero-crossing protection to minimize electrical stress, prevent relay contact welding, and extend device life by up to ten times compared to traditional smart switches.*

Test results based on TP-Link laboratory conditions.

Comprehensive Safety Protection

Built with multiple layers of protection to ensure safe operation in every environment:

- Obstacle detection for roller shutters.
- Relay failure alerts through the Tapo app.
- Overload, overheating, and power protection safeguards.

Compact Build for Easy Installation

Its small size allows the Tapo S112 to fit into tight spaces such as behind switches, near light fixtures, or inside wall outlets. Compatible with small EU junction boxes for a clean and simple installation.

Dimensions:

- 44.7 mm x 40.7 mm x 16.1 mm

Bluetooth Setup and Offline Access

Bluetooth connectivity enables quick configuration and control even without Wi-Fi. If your router goes offline or passwords change, you can still manage connected devices directly through the Tapo app without dismantling the switch.

Effortless Configuration Options

- Set up easily via Bluetooth with the Tapo app.
- Scan the Matter QR code to onboard through Matter-compatible platforms, including Alexa, Apple Home, Samsung SmartThings, and Google Home.

Technical Modes for Installation

- Roller Mode
- Switch Mode

Wiring instructions and diagrams are available through TP-Link's setup guide for secure installation and optimal performance.

Enhance Your Smart Home with Tapo Smart Actions

Pair the Tapo S112 with other Tapo smart devices to automate daily routines, synchronize lighting with motion sensors, and create custom scenes tailored to your lifestyle.
