Specifications

About this product

The delivers professional-grade ergonomics with its SYNC4 synchronous tilt mechanism, 3D x 360degrees armrests and breathable mesh back to ensure optimal comfort for extended work or gaming sessions.

Overview Summary

Performance tier:Premium ergonomic gaming/office seating

Uses:gaming, office work, streaming, long sessions

Engineered to support long hours at your desk, the ThunderX3 SOLO 360 Mesh combines a high-adjustability frame with a lightweight steel base and class-4 gas lift for durable support. Its synchronised seat and back recline allow the body to shift naturally, while the armrests rotate a full 360 degrees and adjust in height, depth and orientation to suit your posture. The breathable mesh back promotes airflow and keeps you cool during intensive use.

Whether you're gaming, working from home or editing video, this chair is built to adapt to your body and your workflow. With a weight capacity of up to 125 kg (approximately) and an intuitive adjustment layout, you'll spend less time fiddling with settings and more time focusing on performance and comfort.

Overview

The most affordable gaming chair with a SYNC4 synchronous tilt adjustment mechanism, featuring an all-directional 360-degree armrest design and multiple style options.

Description

The ThunderX3 SOLO 360 Mesh gaming chair arrives ready to elevate your sitting experience with sculpted ergonomics and flexible adjustability. The steel-framed structure gives a solid foundation while the fully moulded foam seat and mesh back wrap comfortably around your posture. A self-adjusting backrest coupled with synchronous tilt means your seat and back move in harmony for fluid support when you lean or recline.

A standout feature is the 3D x 360degrees multifunctional armrests, offering height, depth and swivel adjustments to align your arms, wrists and shoulders precisely while gaming or typing. The mesh backing enhances airflow so you stay cooler in longer sessions, and the class-4 gas lift ensures stable and responsive height adjustment.

Designed to suit a range of users, the chair supports up to 125 kg and caters to occupant heights from around 155 cm to 190 cm (per one retailer). The integrated headrest, ergonomic lumbar curvature and multi-angle lock mechanisms make it equally suited to high productivity days or relaxed gaming evenings.

Features

Key highlights of this high-performance ergonomic chair include:

- SYNC4 synchronous tilt mechanism supports seat and back recline together for balanced posture control.
- 3D x 360degrees multifunction armrests adjust in six directions (height, depth, swivel) to match your sitting style.
- Breathable mesh backrest for enhanced airflow and sustained comfort during intensive sessions.
- Steel frame and class-4 gas lift tested to BIFMA X5.1 standard ensure durability and long-term reliability.
- Lumbar curvature and adjustable headrest deliver tailored support to the spine and neck, reducing fatigue over time.

SYNCHRONOUS TILT

We prioritize user comfort, so you can simply lean back and relax while experiencing the benefits of our innovative design. Synchronous tilt allows the backrest and seat to move together at the optimal ratio, providing ergonomic support for your entire body.

FOUR LEVELS OF FINE-TUNED COMFORT

Adjust your chair to fit your individual body shape, size, and posture. SOLO 360 is built with SYNC4, a multi-functional mechanism that allows for 4-way adjustability.

With synchronous tilt, simply lean back to recline the backrest and seat simultaneously for a more comfortable, ergonomic sitting experience.

FREEDOM FOR YOUR ARMS

Now you can experience an innovative armrest that can match the exact position and angle of your arms. It adjusts up & down, front & back, and even rotates a full 360degrees so you never have to worry about awkward upper body positioning ever again.

ARMRESTS THAT COVER YOUR EVERY MOVE

Rotate your armrests 90degrees for side-to-side motion support, reducing arm fatigue when you're gaming or typing for long periods.

LEAN INTO YOUR WORK WITH EASE

The armrests can be turned 180degrees to bring the chair closer to the table. Retract the armrests backward to find a better angle for your work or studies.

PERFECT FOR HEAD AND BACK COMFORT

The adjustable headrest moves vertically and locks into place for tailored neck and head support. A curved ergonomic lumbar design promotes natural spine alignment and healthy posture.

PROVIDING COMFORT AND DURABILITY

SOLO 360's molded foam offers superior comfort and long-lasting support, maintaining its shape far better than standard cutting foam. Its precision-molded design also allows for more distinctive, ergonomic contours that elevate both style and seating experience.

EASY AND ACCESSIBLE STORAGE

Comes with a convenient seatback pocket, designed to keep your gaming essentials within arm's reach. Whether it's your controller, snacks, or a spare headset, this clever storage solution ensures you never miss a moment of gaming action.

6D ADJUSTABILITY FIND YOUR SWEET SPOT

With six dimensions of adjustability, choose from a plethora of seating configurations to find the setting that fits you just right.

ADJUSTABLE BACKREST

Fully adjustable backrest allows you to recline your chair to take a power nap or just sit back and relax.

ADJUSTABLE SEAT HEIGHT

Adjust the chair to your preferred height with a conveniently located lever. Class-4 hydraulic gas lift allows for smooth and seamless height adjustment.

STURDY AND RELIABLE

Our Class 4 gas lift, certified by BIFMA X5.1, supports up to 331 lbs and is engineered to last through over 100,000 cycles, ensuring unparalleled strength and longevity while you sit comfortably.

What's in the Box

- ThunderX3 SOLO 360 Mesh gaming/office chair (fully-assembled components)
- 350 mm steel base
- 65 mm nylon casters
- User manual with adjustment instructions
- Warranty information card

FAQ

What type of material is used for the backrest?

The backrest uses a breathable mesh surface which promotes airflow and helps maintain comfort during prolonged sessions.

Can the armrests be adjusted in multiple directions?

Yes, the armrests offer full 3D adjustability and a 360degrees swivel, allowing customization in height, depth and rotation to suit different setups and postures.

What is the weight limit for this chair?

The specified maximum carry capacity is 125 kg, making it suitable for most users in a professional or gaming environment.

Is the tilt mechanism suitable for leaning back and relaxing?

Yes, the SYNC4 synchronous tilt mechanism allows the seat and backrest to recline together smoothly, offering a comfortable reclined posture while maintaining ergonomic support.
