UB-POE-F

Ubiquiti Fiber + Power Solution for Outdoor PoE Devices

Product Overview

Ubiquiti Fiber + Power Solution for Outdoor PoE Devices

Specifications

Overview:

- Overcome PoE limitations with the FiberPoE is a low-cost solution for outdoor deployments that require long-distance runs to reach the PoE device. Deployments with the FiberPoE also provide significant EMI and ESD protection over typical PoE installations.
- PoE is ideal for indoor or short-run installations. However, for outdoor, long-distance installations PoE becomes vulnerable to EMI and is limited to 100 meters with correlated power loss. With the FiberPoE, data and power are transported on separate cables to greatly improve data integrity and enable much longer cable runs.
