

USBCHDMI

Microworld USBCHDMI Type-C to HDMI cable - 1.5m

Product Overview

Microworld USBCHDMI Type-C to HDMI cable - 1.5m, Supports Full HD / 4K Resolution

Specifications

Overview Summary:

The Microworld USB-C to HDMI Cable (1.5m) provides a direct and stable connection between USB-C enabled devices and HDMI displays. It supports both Full HD and 4K resolution output, making it suitable for high-quality video streaming, presentations, and extended display setups.

Designed for plug-and-play operation, it requires no additional drivers or configuration. Simply connect your laptop, smartphone, or tablet to a monitor, TV, or projector for immediate audio and video transmission. Shop now to simplify your display connectivity needs in South Africa.

Performance tier:Mid-range performance

Uses:Laptop-to-TV display, office presentations, classroom teaching, home entertainment, external monitor setup

Overview:

USB Type-C to HDMI Cable 1.5m for 4K and Full HD Connectivity

The Microworld USB Type-C to HDMI cable provides a direct and stable connection between USB-C enabled devices and HDMI displays. With a 1.5 metre length, it is designed to offer practical reach for desktop setups, meeting rooms, and home entertainment environments without unnecessary cable clutter. It supports both Full HD and 4K resolution output, ensuring clear visuals and reliable audio transmission for everyday use, presentations, and media playback.

Description:

The Microworld USB Type-C to HDMI cable is built to deliver consistent digital audio and video signals from compatible USB-C devices to HDMI-equipped screens. It is suitable for laptops, smartphones, and tablets that support DisplayPort Alt Mode over USB-C, enabling seamless external display connectivity without additional software or drivers.

Engineered for plug and play use, this cable removes the need for complex setup procedures. Once connected, it automatically transmits audio and video signals to the display, making it suitable for both professional and personal environments. The moulded connector design improves durability and ensures a secure fit during repeated use.

Features:

USB-C to HDMI Connectivity and Use Cases

This cable is intended for users who need a straightforward way to extend or mirror their display to larger screens. It is commonly used in office presentations, classroom environments, and home entertainment setups where reliability and image clarity are important.

Typical use scenarios include:

- Connecting a laptop to a monitor for extended workspace productivity
- Streaming content from a compatible smartphone to a television
- Delivering presentations via a projector in meeting rooms or classrooms
- Creating dual-screen setups for improved multitasking

Display Performance and Compatibility

The cable supports high-definition output up to 4K resolution, depending on the capabilities of the connected device and display. It ensures stable signal transmission for both video and audio, reducing interruptions and maintaining consistent performance during use.

To function correctly, the source device must support USB-C DisplayPort Alt Mode. Without this feature, video output will not be enabled through the cable.

Build Quality and Practical Design

Designed with everyday use in mind, the 1.5 metre cable length offers flexibility without excess slack. The connectors are moulded for improved strain resistance, helping maintain long-term durability under regular plugging and unplugging.

Key technical points include:

- Cable length: 1.5 metres
- Video output support: Full HD and 4K (device dependent)
- Connection type: USB Type-C to HDMI
- Functionality: Plug and play operation
- Compatibility: Devices with USB-C DisplayPort Alt Mode support

Part Number / SKU: USBCHDMI

Reliable Digital Output for Multiple Devices

This cable is suitable for users looking for a simple, dependable solution to connect modern USB-C devices to HDMI displays. It is designed to maintain stable performance across a range of everyday applications, from business use to home media viewing, without requiring additional configuration or adapters.
