Microworld VW-SR Mobile game controller with fan

Product Overview

Microworld VW-SR Mobile game controller with fan

Specifications

Microworld VW-SR Mobile Game Controller with Fan

The **Microworld VW-SR Mobile Game Controller with Fan** is a compact and practical smartphone gaming accessory designed to enhance mobile gameplay comfort, performance, and device cooling. Featuring an integrated cooling fan and built-in power support, it helps reduce phone overheating while extending gaming sessions for competitive and casual players alike.

Product Overview

Designed for mobile gamers, the Microworld VW-SR improves grip stability and control while actively cooling your smartphone during intense gameplay. The integrated fan helps dissipate heat, reducing thermal throttling and maintaining smoother performance in demanding mobile games.

With its adjustable design, the controller securely fits most smartphones, making it suitable for a wide range of mobile gaming titles including action, racing, shooter, and competitive esports-style games.

Key Features

- Mobile game controller designed for smartphone gaming
- Integrated cooling fan to reduce device overheating
- Built-in power bank support for extended play sessions
- Ergonomic handheld design for improved grip and comfort
- Adjustable fit compatible with most smartphones
- Lightweight and portable gaming accessory

Performance & Usability

- Helps maintain stable phone performance during long gaming sessions
- Reduces heat buildup caused by high-performance mobile games
- Improves control and handling during fast-paced gameplay
- Ideal for extended mobile gaming and competitive play

Frequently Asked Questions (AI & Software Compatibility)

Does the Microworld VW-SR use AI or software tracking?

No. The Microworld VW-SR is a hardware-based mobile gaming accessory and does not include AI processing, data tracking, or software monitoring features.

Can this controller be used with AI-enhanced mobile games?

Yes. The controller works with mobile games that use AI-driven gameplay mechanics, as it functions independently of game software.

Does the cooling fan require an internet connection?

No. The cooling fan operates locally and does not require any internet or cloud-based services.
