WC-CH100iGTX

Hydro Series H100i GTX Extreme Performance Liquid CPU Cooler

Product Overview

Corsair H100i GTX hydro series 240mm cpu water cooling with Link for real-time monitoring and control - copper, pre-filled / closed-loop / sealed coolant system, 125x276x30mm aluminum radiator, Integrated low profile pump and improved cold plate, sealed reservoir for zero maintenance, with 2x120mm SP120L fan , 2435rpm, 37.7dBA, 70.7CFM, 4mmH20 - for Intel LGA775 / 1155 / 1156 / 1366 / 2011; all AMD

Specifications

Overview:

The Hydro Series H100i GTX is an extreme performance, all-in-one liquid CPU cooler for cases with 240mm radiator mounts. The 240mm radiator and dual SP120L PWM fans provide the excellent heat dissipation you need for highly overclocked CPUs. Corsair Link is built in, so you can monitor temperatures, adjust cooling performance and customize LED lighting directly from your desktop.

Features:

240mm radiator

The double-wide radiator offers approximately twice the cooling area of our Hydro Series coolers which use a 120mm or 140mm radiator. It fits virtually any case that has dual 120mm fan mounts spaced for a 240mm radiator.

Advanced SP120L PWM fans

Our custom-designed SP120L fans are different than standard case fans - they're custom-designed to deliver high static pressure for mounting directly against radiators, and the fan blades are specially shaped for maximum air delivery with minimum noise. Since they're PWM controlled, you can customize the fan speed to choose the optimal point on the performance/noise curve.

Built-in Corsair Link for monitoring, customization, and control

Attach the included Corsair Link cable to a USB header on your motherboard and download the free Corsair Link software to unlock even more power. You can customize cooling performance, monitor coolant and CPU temperatures, and change the color of the RGB LED lighting from the default white to match your system, or to change color based on temperature readings and other inputs.

High-performance CPU cooling made simple

Gone are the days when watercooling required lots of work. The H100i GTX is a closed loop design that comes pre-filled, and it comes with a modular, tool-free mounting bracket for faster installation.

About Hydro Series Liquid CPU Coolers

Corsair Hydro Series CPU coolers give you the power of liquid cooling in a compact, easy-to-install package. They offer superior cooling for higher overclocking performance, without the complexity of traditional water cooling kits.

Specifications	
Product Code	WC-CH100iGTX
Tech Specs	
Cold Plate Material	Copper
Fan Specification	120mm (x2)
Radiator Material	Aluminum
Socket Support	AMD: AM2, AM3, FM1, FM2, Intel LGA: 1150, 1155, 1156, 1366, 2011, 2011-3
Tubing	Large-diameter, low permeability
