Uses: Everyday household laundry, washing cotton clothing, synthetic fabrics, wool garments, baby clothes, bedding, shirts, lightly soiled clothing, allergy care washing and quick laundry loads

Overview

Hisense WF1I6022BT is a 6kg free-standing front loader in titanium grey with LED display and touch control for a modern, easy-to-use laundry experience. It features 15 wash programs, including Quick 15', Cotton, Eco 40-60, Wool, Baby Care, Steam, and Bedding, plus spin control and skip-spin options. With inverter technology, Jet Wash, raindrop drum, child lock, delay start/end, and A+++ wash efficiency, it's built for efficient, reliable daily washing.

Description

The Hisense WF1I6022BT Front Loader Washing Machine combines practical laundry functionality, modern washing technology and a space-conscious design. With a 6kg washing capacity, it is suitable for smaller households, apartments and users who need a dependable appliance for regular laundry loads. Its freestanding design allows flexible installation in a suitable laundry area with the required water and electrical connections.

15 Washing Programmes for Different Laundry Needs

Choose from 15 dedicated washing programmes designed for different garment types and laundry requirements. Programmes include Cotton, Eco 40-60, Synthetics, Wool, Down, Baby Care, Rinse + Spin, Spin, Drum Clean, Allergy Care, Auto, Shirts, Bedding and Power 49'/30', as well as Quick 15'. These options allow users to select suitable washing cycles for everyday clothing, delicate fabrics, bedding and smaller laundry loads.

iBubble Detergent Technology

Hisense iBubble technology uses a water vortex in the detergent dispenser to improve the dissolving of washing powder. It

creates a dense foam to help distribute detergent throughout the laundry, reduce detergent residue and improve washing efficiency. This technology is designed to help make better use of detergent during the washing process.

Pure Jet Cleaning Technology

Pure Jet technology uses powerful water jets to help remove dirt and stains from laundry. By directing water through the washing load, the system supports effective cleaning performance, including when dealing with more heavily soiled garments.

Inverter Motor and Steam Function

The integrated inverter motor provides the power required for the washing machine's operating cycles. The additional steam function offers another option for fabric care, while the Allergy Care and Baby Care programmes provide dedicated washing choices for particular household laundry requirements.

Raindrop Drum Design

The raindrop drum design provides a specialised internal drum surface for handling laundry during washing. Combined with the machine's range of fabric-specific programmes, it supports everyday garment and textile care.

Convenient Controls and Safety

The LED display and touch control panel make it easier to select programmes and manage washing settings. Spin speed selection and the Skip Spin option provide additional control over the washing cycle. Load detection, memory backup, delay start/end, electronic spin speed management, balance control and an anti-foam sensor system provide further convenience and operational support. A child lock helps prevent unintended changes to the selected settings.

Compact Freestanding Design

Finished in titanium grey, the Hisense WF1I6022BT has net dimensions of 595mm wide, 450mm deep and 845mm high. Its compact cabinet depth makes it a practical option for smaller laundry spaces, provided adequate installation and operating clearance is available.
